QAZI MUHAMMAD WAIZ

GENAI ENGINEER

Karachi | www.qmwaiz.me
03247601640 | waizqazi2@gmail.com

My passion for trading sparked a deep interest in algorithmic decision-making, which led me to develop a multi-agent trading bot powered by machine learning. This project became a gateway into the broader field of artificial intelligence, where I gained hands-on experience with libraries like TensorFlow, PyTorch, scikit-learn, and Gymnasium. Now, I specialize in building Generative AI systems that enhance business efficiency, automate workflows, and unlock new forms of intelligent interaction

EXPERIENCE

MACHINE LEARNING DEVELOPER

Self | Remote

2024 – PRESENT

Delivered real-world solutions by implementing machine learning and reinforcement learning algorithms, while collaborating with multiple clients to ensure seamless project execution and measurable impact.

AI DEVELOPER

Local Startup | Remote

2024 – 2025

Compiled, cleaned, and engineered data to uncover insights from Big datasets, identifying patterns in customer behavior. Applied feature selection techniques and developed predictive models using machine learning algorithms .

CRYPTO TRADER & MARKET ANALYST

Independent | Remote

2021 – PRESENT

Conducted comprehensive technical and fundamental analysis across major cryptocurrencies to identify high-probability trading opportunities. Executed both short-term and swing trades using a data-driven, risk-managed approach.

CERTIFICATIONS

- Meta Back-End Developer — Dec 2024
- IBM AI Engineer — June 2025
- Data Engineer Associate — Jan 2025
- Data Analyst Associate — Feb 2025

SKILLS

- Deep learning algorithms
- Reinforced Learning
- SQL Databases
- Machine learning frameworks
- Supervised Learning
- Time series analysis
